

A  
Report on  
**A BLOGGING WEBSITE**

Submitted in partial fulfillment of the requirement for the award of degree  
of B.Tech

**Lovely Professional University**

Team : 18

Name : Muhammad Yusuf Kamal

Topic : A Blog Website

Registration Number : 12113611

Roll Number : RK21PPB59

Section : K21PP (Group-2)

# Introduction:

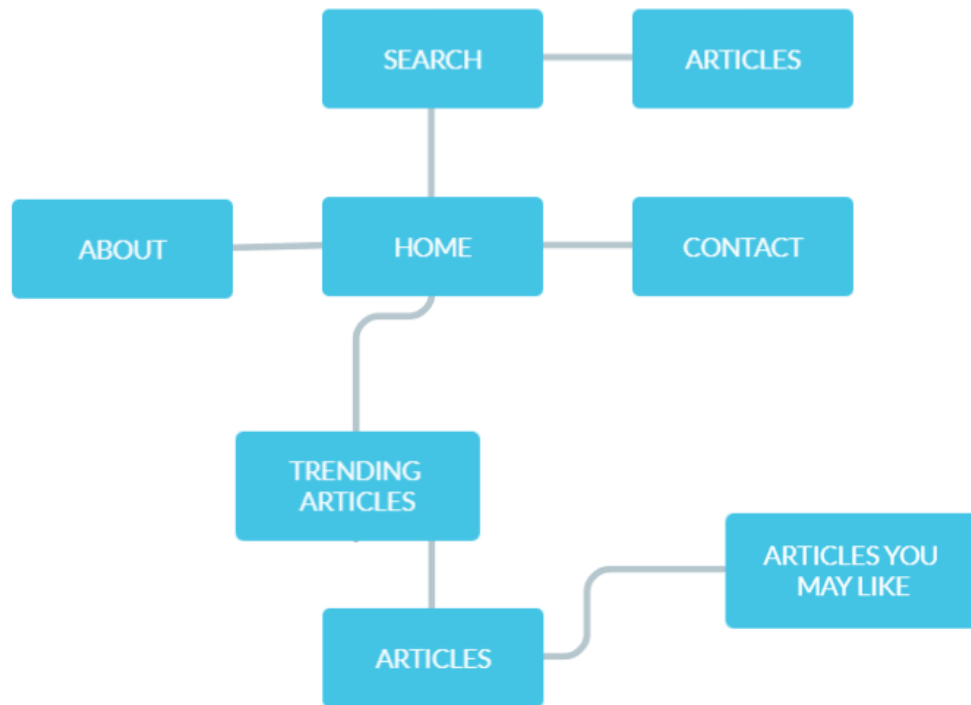

In this project we are going to build a blogging website using HTML (Hypertext Markup Language), CSS (Cascading Style Sheet) and JS (JavaScript).

The word blog is actually a shortened form of its original name, "weblog." These weblogs allowed early internet users to "log" the details of their day in diary-style entries. Blogging refers to writing, photography, and other media that is self-published online. Blogging started as an opportunity for individuals to write diary-style entries, but it has since been incorporated into websites for many businesses.

## Objective:

Our Objective is to build a responsive blogging website where, not only one can read articles what they are searching for but also can read what is trending in article section. And in addition to that one can also read articles related to what he or she is reading. Our motto is to build a safe and add-free environment where you can read articles for free, and it is super user-friendly as well.

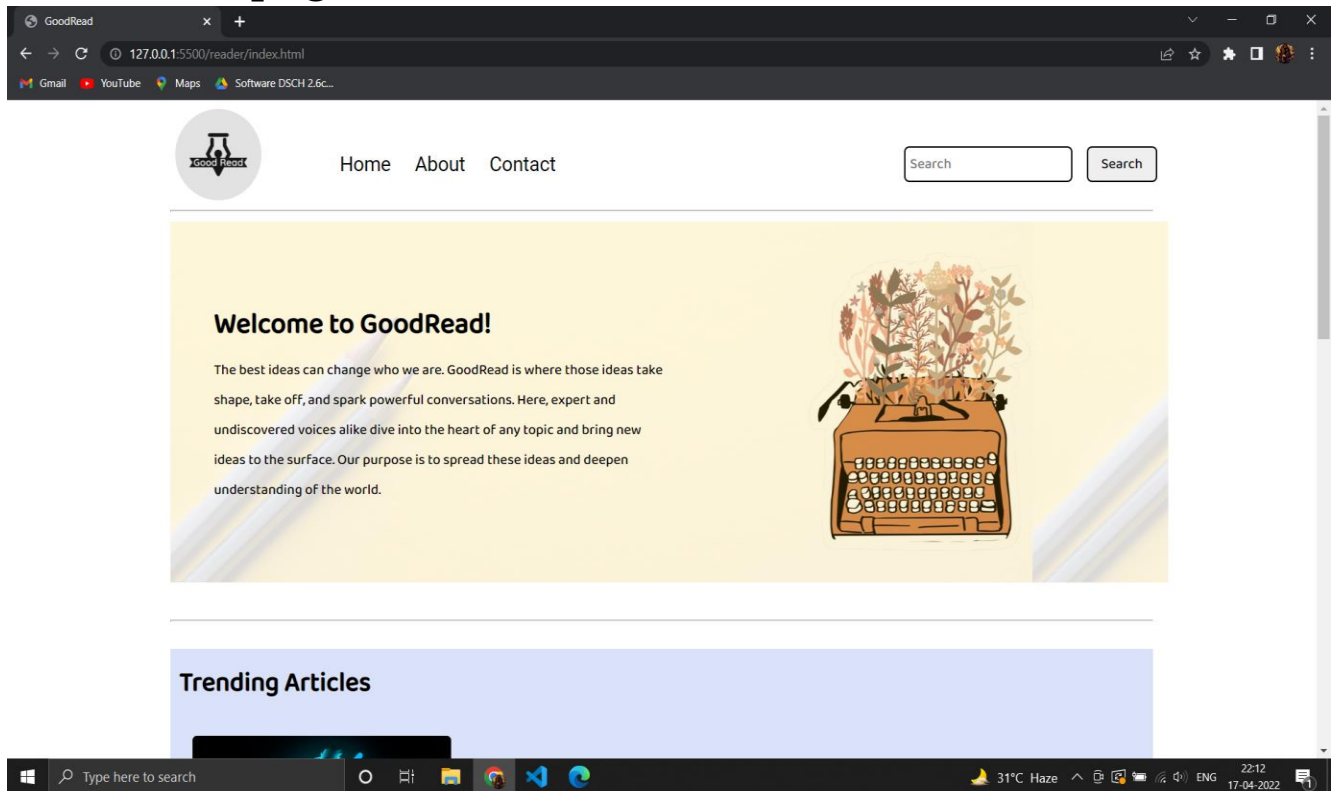

## Flowchart:

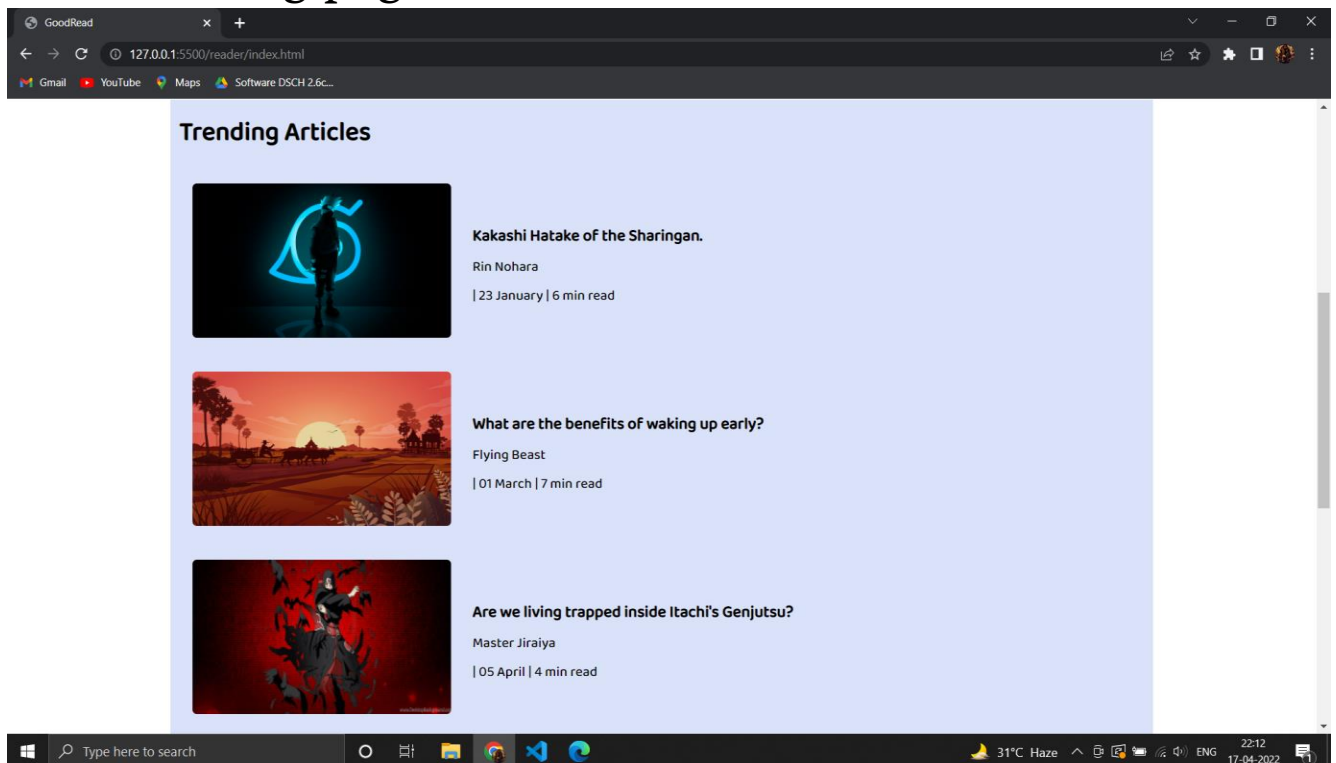

## Word done by Individual team member:

This website is fully built by me (Muhammad Yusuf Kamal, Registration number: 12113611) including the report part. Some of the webpages I have built are as follows:

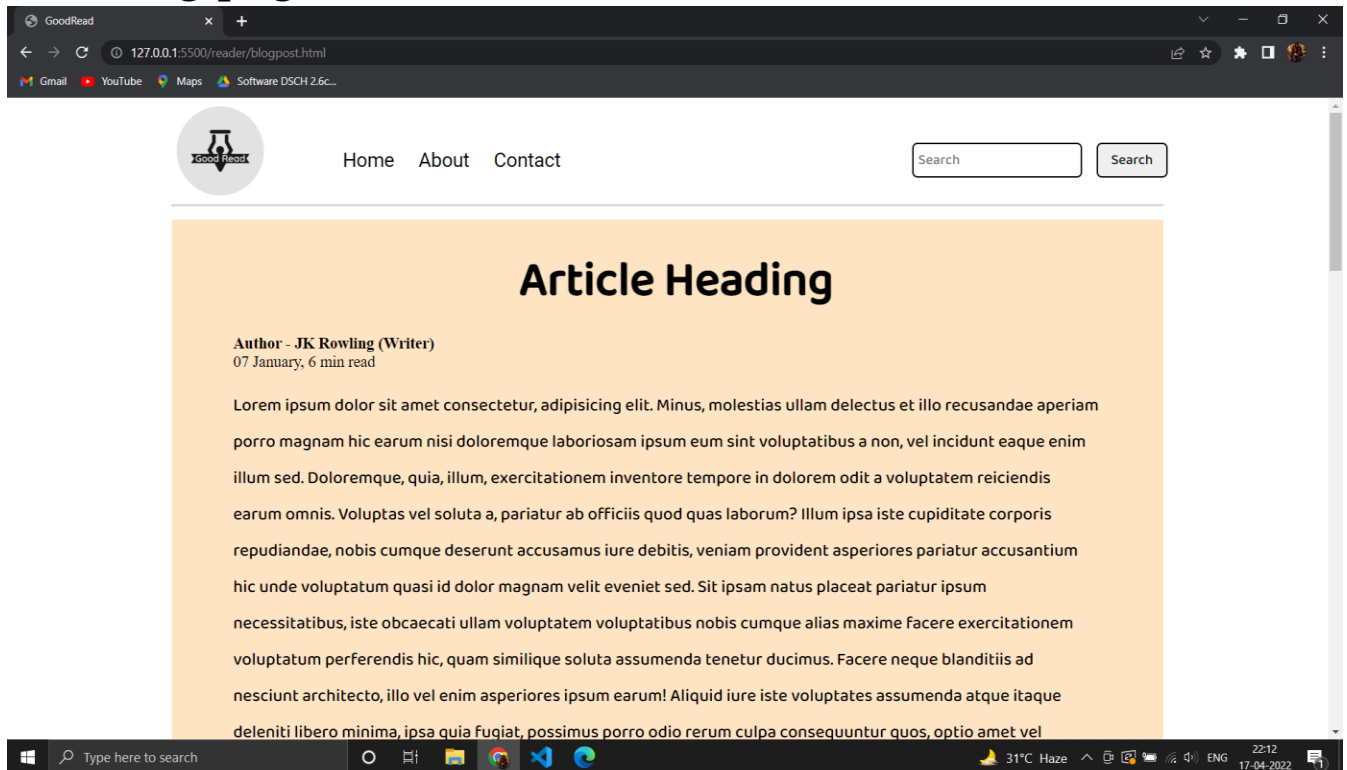

## The Home page:

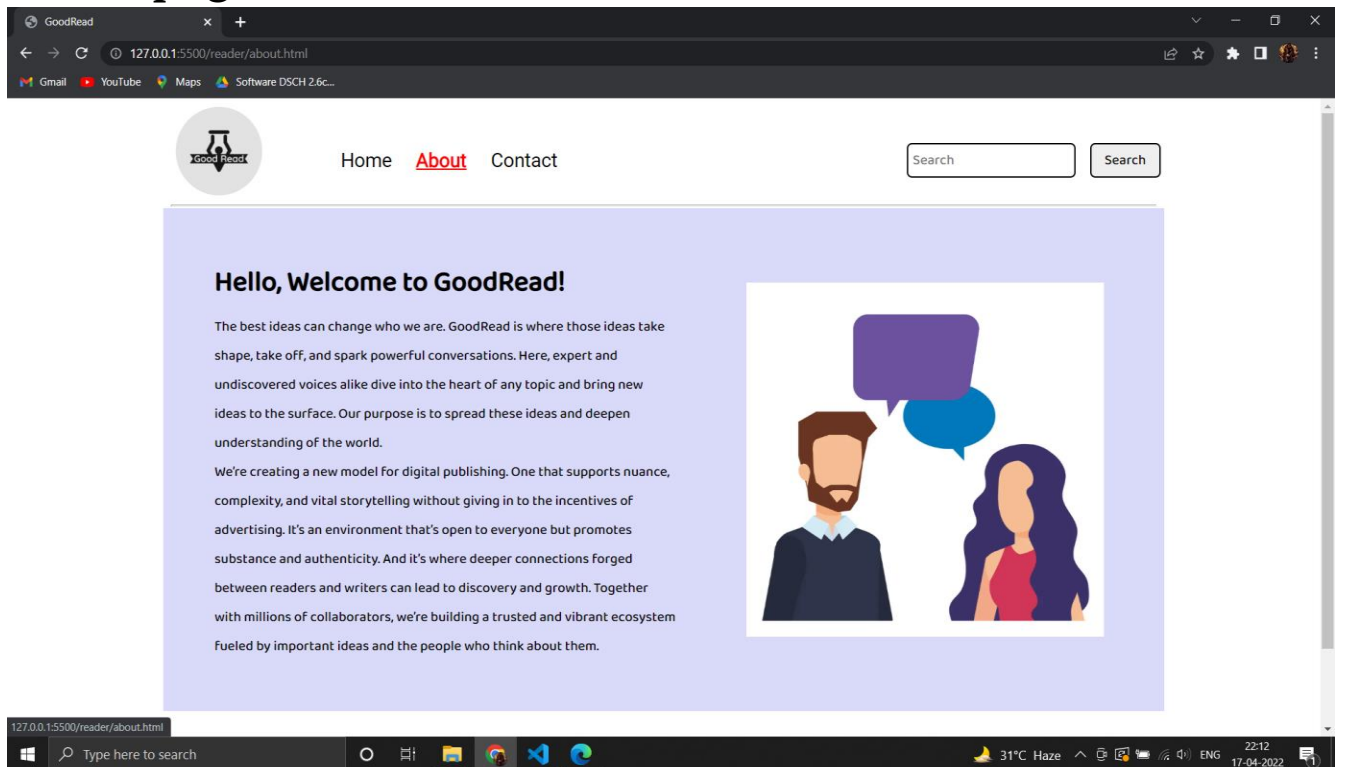

## The Trending page:

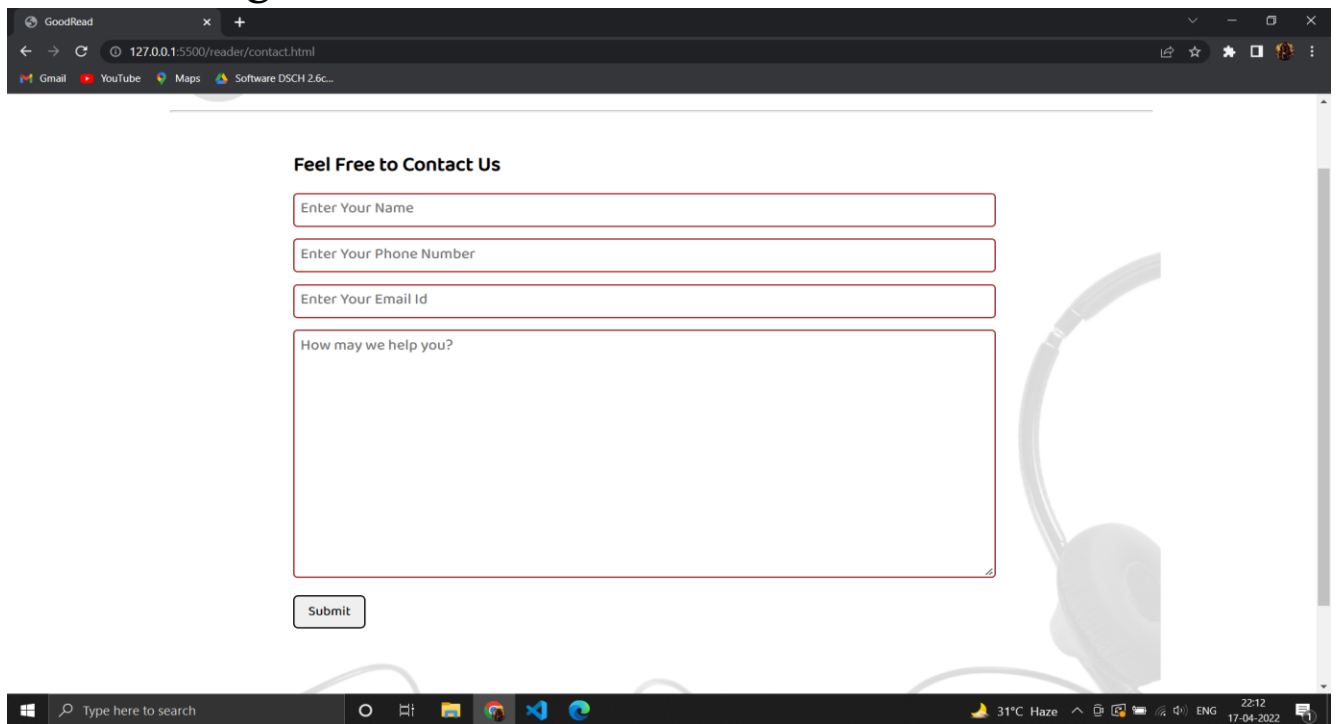

## The Blog page:

## About page:

## Contact Page:

A screenshot of a web browser displaying the 'GoodRead' contact page. The browser's address bar shows the URL '127.0.0.1:5500/reader/contact.html'. The page has a dark header with the 'GoodRead' logo and navigation links for 'Gmail', 'YouTube', 'Maps', and 'Software DSCH 2.6c...'. The main content area is titled 'Feel Free to Contact Us' and contains a contact form with four input fields: 'Enter Your Name', 'Enter Your Phone Number', 'Enter Your Email Id', and a larger text area for 'How may we help you?'. A 'Submit' button is located below the text area. The background of the page features a faint image of a person wearing headphones. The Windows taskbar at the bottom shows the search bar, taskbar icons, and system tray information including '31°C Haze', 'ENG', and the date '17-04-2022'.

GoodRead

127.0.0.1:5500/reader/contact.html

Gmail YouTube Maps Software DSCH 2.6c...

**Feel Free to Contact Us**

Enter Your Name

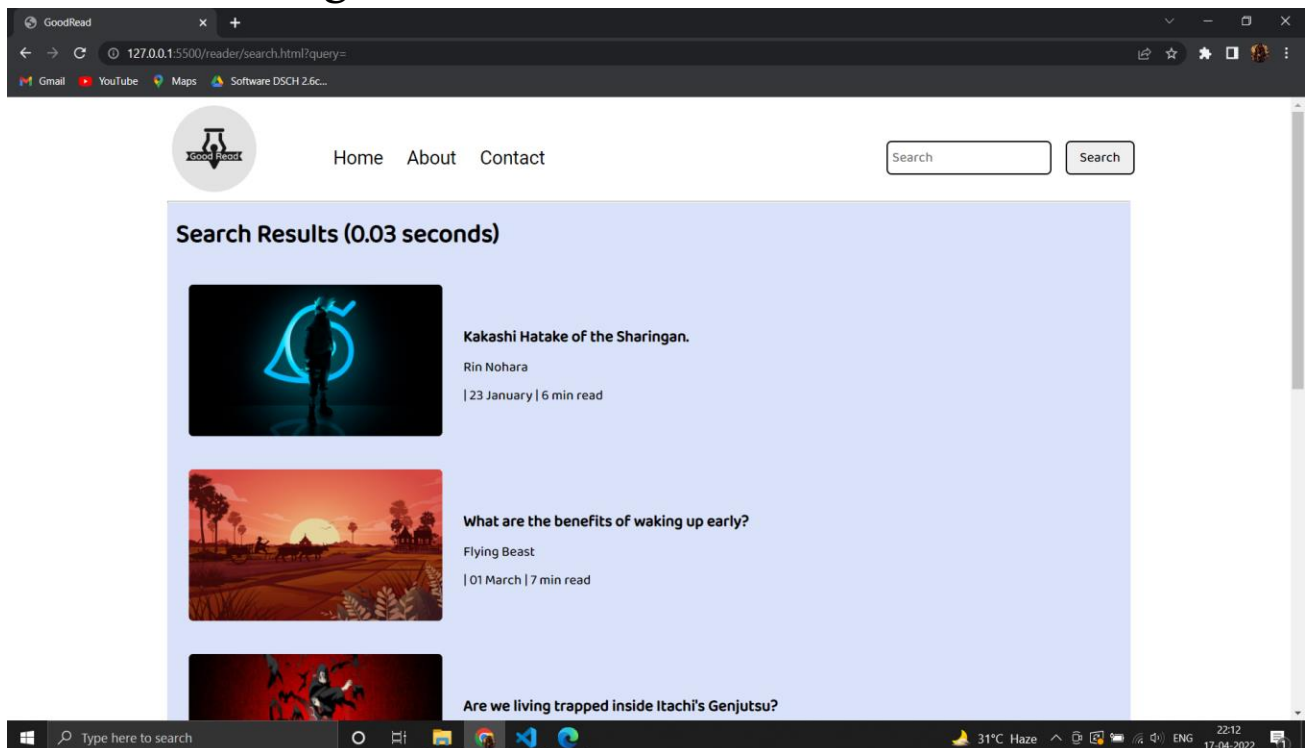

Enter Your Phone Number

Enter Your Email Id

How may we help you?

Submit

## The Search Page:

A screenshot of a web browser displaying the 'GoodRead' search page. The browser's address bar shows the URL '127.0.0.1:5500/reader/search.html?query='. The page has a dark header with the 'GoodRead' logo and navigation links for 'Home', 'About', and 'Contact'. There are two 'Search' buttons on the right. The main content area is titled 'Search Results (0.03 seconds)' and displays three search results. Each result includes a thumbnail image, a title, an author, and a date/length. The first result is 'Kakashi Hatake of the Sharingan.' by Rin Nohara, dated '23 January' and '6 min read'. The second result is 'What are the benefits of waking up early?' by Flying Beast, dated '01 March' and '7 min read'. The third result is 'Are we living trapped inside Itachi's Genjutsu?'. The background of the page features a faint image of a person wearing headphones. The Windows taskbar at the bottom shows the search bar, taskbar icons, and system tray information including '31°C Haze', 'ENG', and the date '17-04-2022'.

GoodRead

Home About Contact

Search Search

**Search Results (0.03 seconds)**

 **Kakashi Hatake of the Sharingan.**  
Rin Nohara  
| 23 January | 6 min read

 **What are the benefits of waking up early?**  
Flying Beast  
| 01 March | 7 min read

 **Are we living trapped inside Itachi's Genjutsu?**

## Conclusion and Future Scope:

Making a fully responsive website is a great way to learn HTML, CSS, and JS, all at once. I got to learn a lot from this project, like making different web pages and linking them to make a website, importing google fonts, using display flex etc. It was fun and a learning experience as well.

Talking about this website, it will be extremely helpful for the people who read articles on daily basis because of its add-free experience and easy to use, and it will be peoples' favourite blogging website in no time.

Now, let us discuss the future scope of this, we can add many new features like login option and giving user to write blog, that will make this website complete and since user can also write blogs in this, it will help people sharing ideas and thoughts across globe.

We can also add like and comment options on blogs for better communication, that way the author can communicate with his audience easily.

## References:

The reference to make this website is taken from following place:

- CodeWithHarry : This is the place from where I got my inspiration from.
- GeeksforGeeks: for every small or big doubt and codes.
- Pintrest/vecteezy/vectorStock: for all the vectors used in the making of this website.
- Medium.com: a blogging website for the reference of how blogging website look.
